CELFINET SELECTED AS THE PORTUGUESE NATIONAL WINNER AT THE EUROPEAN BUSINESS AWARDS 2018

Software and Consulting Company, Celfinet, has made it to the final stage of the European Business Awards 2018, to be held in Poland on 22nd May.

The company was recognized at the European Business Awards, where it stood out in the RSM Entrepreneur of the Year category, among other fellow Portuguese entrepreneurs.

Selected from 111 fascinating projects, Celfinet was the final title-holder between the Ones to Watch in Portugal this year.

Adrian Tripp, CEO of the European Business Awards stated: "The talent, dedication and innovation at the heart of these companies creates jobs and opportunity, and is what drives their country's prosperity. The 'Ones to Watch' lists will set a benchmark of success for the European business community."

Celfinet will be joining 11 other National Winners, and attend the final stage of the competition at the European Business Awards Summit and Gala 2018.

The summit will provide relevant business insights and seminars for the participants, as well as evaluate the winning projects more carefully in three dedicated sessions. In the end, it will be all about celebrating achievements and developing new relationships.

CEO & Founder of Celfinet, Nuno Ribeiro, said: "It's an honor to represent the Portuguese entrepreneurial landscape at the European Business Awards Summit this year, and see our hard work recognized among the best."

The event takes place at the Hilton Warsaw Hotel and Convention Centre, on 22nd and 23rd May, gathering successful entrepreneurs and business leaders from 34 European nations. It will be a great opportunity to gather insights on several areas of expertise and be closer to Europe's biggest market makers.

About Celfinet:

Founded in 2003, Celfinet was born with a powerful vision: to develop innovative engineering solutions that could "turn RAN management complexity into simplicity".

To achieve such an ambitious milestone, they developed VISMON. A platform that allows to address and simplify the management of mobile telecommunication networks, whether in terms of configuration, performance or energy consumption.

Based in Portugal, and with a team of more than 250 engineers spread across 4 continents, Celfinet has become a major technological reference for some of the largest mobile telecommunication operators in the world.
